Proteiema asimetric invers ... solució general

. Canonaid des CH Ren CET Significa :

Here
$$\frac{d_{i}}{de^{2}}$$
 $\overrightarrow{R}_{OH}(e)$ = $\overrightarrow{F}_{FOE} = \Sigma \overrightarrow{F}_{i}$

Lo trajectònia del en Ren (t) di la mateixa que la divia mosso Antecal Medit Totrita a les mateixes forces

Here
$$\frac{\nabla}{\nabla}$$
 on (e) : Here, $\frac{\partial R_{en}}{\partial e}$ = $\frac{\partial}{\partial}$ monthly direct $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ (c)

First (e) = $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ (c)

Liquid (rests $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ (rest)

Liquid (rests $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ (rest)

Liquid (rests $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ (rest)

Liquid (rests $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ (rests $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ (rests $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e}$ (rests $\frac{\partial}{\partial e}$ = $\frac{\partial}{\partial e$

 $e_j = 0$ BOOK NO 6: = UNDES NO (3) $\Delta x_0 = \sum_{j=1}^{10} \frac{\partial x_0}{\partial y_j} \cdot e_j$ Formally the Definition Definition of $x_0 = x_0$ $x_1 \cdot e_j \cdot (e_j \cdot (e_j \cdot e_j \cdot e$

(1) Conciden X = 5 Ka (
$$\Theta_j$$
)

conciden the $t:\Theta_j$ X $j(\Theta)$

$$Conciden en t+\Delta t: X_j^*(t+\Delta t)$$

Axa (eqti

Tresident
$$X_{ij}$$
 (a) $(x_{ij}) = x_{ij}$ (a) $(x_{ij}) = x_{ij}$ (b) $(x_{ij}) = x_{ij}$ (c) $(x_{i$
